Automated Meter Infrastructure – Ms. Riner said Boonsboro has started talking about this again. Fortiline Waterworks stopped by Town Hall and gave an overview of their product. They have acoustic detection, which can find leaks on both sides of the meter. It is approximately \$12,500.00 for the collector (antenna) to go on the tower, plus the cost to install. They will have to replace every meter in town at \$309.00 per meter, for about \$126,000.00. There is software that needs to be bought for \$3,000.00 per year. Ms. Riner thinks Boonsboro may have received grant funding for this, but hasn't had a chance to talk to them about it.
